

little bit of effort can be the difference. I've rolled up my sleeves to send hundreds of these letters to folks like you who have the power to make a difference in this election. I urge you to do your part to stop Trump too and so I'm asking you to get the word out: to support Cruz, Rubio, or any other candidate not named Trump for the nomination, Ohio Republicans need to vote for Kasich. It may be our only hope of stopping Trump. **You can spread the word using the enclosed graphic for posting on social media -- just snap the image with your phone and send it on to others, via Facebook, Instagram, etc.**

Let me also briefly explain why I'm doing this. I am not affiliated with any campaign or Super PAC -- I'm just a concerned citizen who has been spurred to action by the dire state of our politics caused by Trump's cult of celebrity. Here's what personally motivates me to undertake this extra effort: I know from my own childhood and the experience of raising two children (currently in 4th and 1st grade) that the office of the President has a special connection with our nation's schoolchildren. Kids growing up in our country study and revere the Presidents, and they look up to the sitting President as an example of what a great leader should be. I shudder to think of the lessons our children or grandchildren might learn from the antics of Donald Trump. We need change in Washington, and while I can't fault Trump supporters for being angry with the direction of the country, I can fault them for being blind to the damage that a Trump (or Clinton/Sanders) presidency will inflict on our country and our children.

Time is running out -- please spread the message today and through March 15: to support Cruz or Rubio for the nomination, every Ohio Republican needs to vote for Kasich in order to Stop Trump!

Thanks very much for your attention and, hopefully, your support in pushing aside the demagoguery of Trump and turning the tide in favor of true conservative principles for our party and our country.

Sincerely,

Eric Hoffman
